ABOUT THIS PROPERTY

The Kumquat Project is a remarkable development opportunity in Coconut Grove, one of Miami's most coveted neighborhoods. This offering includes a prime 11,593 sq. ft. lot paired with a complete set of fully approved architectural plans by Praxis Architecture, ready for construction of a residence. The design and approval process typically takes up to two years. This offering bypasses that entire process, providing an exceptional advantage that saves invaluable time while delivering a truly iconic vision. The proposed residence spans 7,511 sq. ft. total, showcasing thoughtful design, seamless indoor-outdoor flow, and an elegant modern aesthetic. The ground floor features a dramatic double-height living room with natural light and expansive glass. A chef's kitchen opens to a spacious family room that includes an integrated bar. This level also features a guest suite with en suite, a service/multi-use room with en suite, and a study/lounge overlooking the garden canopy. Upstairs: Centers on the grand master suite with a spa-inspired bath and large walk-in closet. It is complemented by two additional bedrooms, each with en suites and a study/lounge overlooking the garden canopy. Every space meticulously balances elegance, functionality, and natural light, capturing the timeless allure of the Grove lifestyle through modern architectural expression. The Kumquat Project is an opportunity to build a statement residence without the wait.
